CIRCULAR TO GLOBAL SHAREHOLDERS

1. INTRODUCTION

Shareholders are referred to the announcement released on SENS on 29 July 2016 advising that Global was in advanced negotiations with ARC for the subscription by ARC of 19 323 671 Global Shares (constituting approximately 26.3% of all the Global Shares following the subscription) at a subscription price of R2.07 per Share to the total value of R40 000 000. ARC does not have an existing shareholding in Global.

A further announcement was released on SENS on 29 September 2016 advising shareholders that, among other things, the Global Subscription Agreement, the Enviroprotek Subscription Agreement and the Voting Pool Agreement had been signed.

In terms of the Global subscription, ARC has also entered into a Voting Pool Agreement along with certain existing shareholders in Global, termed the Concert Parties, in respect of not less than 50% of Global Shares which will allow the Concert Parties acting in concert to maintain the majority shareholding in Global.

In terms of the Enviroprotek Subscription, ARC will subscribe for 9 614 shares in Enviroprotek, constituting 46% of Enviroprotek's shares following the subscription, at a subscription price of R1.00 per share to the value of R9 614. This transaction falls below categorisation requirements in terms of Section 9 of the JSE Listings Requirements and ARC is not a related party to Enviroprotek. This subscription price was negotiated on an arm's length basis at a nominal value, noting that Enviroprotek is effectively a start-up company, with no revenue during the prior year ended 30 November 2015 and operating expenses of around R587k. During the year ending 30 November 2016, this company is still expected to make losses and has a negative net asset value. It is also noted that Enviroprotek is required to be 50% plus one share BEE held in order to receive its petroleum licence and REDISA registration.

The implementation of the agreements referred to above are conditional on, among others, Competition Commission approval and the passing of the Transaction Resolutions.

In addition to the above, Global wishes to ask Shareholders to approve a change in the wording of Global's MoI. The purpose of the change is to align the wording with recent amendments to the JSE Listing Requirements, allowing for meetings to be held in terms of section 60 of the Act.

2. ISSUE OF SHARES UNDER GENERAL AUTHORITY

The Global Subscription is of a class of shares already in issue and will be issued under Global's general authority to issue shares for cash. The general authority allows Global to issue up to 50% of its issued ordinary Shares, being 27 078 787 Shares. Global has not made use of its general authority prior to the Global Subscription. The general authority was passed by Global Shareholders at the annual general meeting held on 13 July 2016.

The subscription price of R2.07 represents a 2.04% premium to the 30-day VWAP as at 27 June 2016, being the date on which the terms of the Global Subscription were agreed and approved by the Board.

The proceeds from the Global Subscription will be invested in various renewable and clean energy projects which Global is undertaking. This is in line with its medium term strategy at the time of its listing on the JSE and following the successful establishment of its first rubber to oil pilot plant.

As at the date of this Circular, ARC is not a related party to Global and is thus considered to be a member of the public as defined in the JSE Listings Requirements prior to the Global Subscription.

3. FINANCIAL ASSISTANCE RESOLUTION

The Global Subscription Agreement and the Enviroprotek Subscription Agreement, which are available for inspection as per paragraph 15, contain various representations, warranties and indemnities and other terms given by Global in favour of ARC.

In terms of section 44(2) of the Act, Shareholders may authorise the Board to provide financial assistance to any person for the purpose of, or in connection with, the subscription of any securities of the company or a related or inter-related company, provided that the provisions of sections 44(3) and 44(4) of the Act are complied with. The ambit of section 44(2) of the Act is very wide.

Under the circumstances it is regarded as prudent, out of utmost caution, to request that Shareholders grant the Board the authority for Global to provide "financial assistance" as defined, to ARC by making certain representations and furnishing certain warranties and indemnities to ARC in respect of the Global group, to facilitate the subscriptions in terms of the Global Subscription Agreement and the Enviroprotek Subscription Agreement.

Accordingly, the Financial Assistance Resolution is proposed order to approve any financial assistance, to the extent necessary, relating to the Global Subscription or the Enviroprotek Subscription.

4. WAIVER OF MANDATORY OFFER

The Global Subscription will result in ARC holding approximately 26.3% of all the Shares after the issue of 19 323 671 new Shares, which will be less than the 35% prescribed level at which a Mandatory Offer must be made under the Companies Act. The Voting Pool Agreement will also only come into effect after the Global Subscription Agreement becomes unconditional. However, the Global Subscription Agreement and the Voting Pool Agreement were entered into simultaneously and form part of one indivisible transaction.

The Concert Parties will go into concert pursuant to the implementation of the Voting Pool Agreement, causing the Concert Parties to exercise a voting power which exceeds 35%, being the prescribed percentage per section 123(5) of the Act.

Whilst going into concert is permitted in terms of the Act without triggering a Mandatory Offer, the intention of the Concert Parties is to control more than 50% of Global pursuant to the Global Subscription and one or more of the Concert Parties may also wish to increase their shareholding in Global in the future.

If any of the Concert Parties were to acquire any (1 or more) number of Shares whilst still in concert, then this may give rise to a Mandatory Offer. Thus, a Mandatory Offer to minority Shareholders could be triggered at that point in time. The approval by Shareholders of the Waiver will permit, among other things, any one of the Concert Parties to acquire additional Shares without triggering a Mandatory Offer. Notwithstanding the foregoing, should the shareholding of any one of the Concert Parties on its own exceed the prescribed percentage in terms of the Companies Act, then that individual shareholder would be required to make a Mandatory Offer at that point in time and the Waiver would not apply in such circumstances.

Accordingly, the parties have approached the TRP for permission to request Eligible Shareholders to vote on a Waiver.

Once the Waiver is approved, the shareholders will not receive a mandatory offer immediately following the Global Subscription or any time any of the respective Concert Parties acquires any further securities under Regulation 86(3) and/or Regulation 84(7), to the extent applicable, except in the instance that an individual shareholder exceeds the prescribed percentage in terms of the Companies Act as mentioned earlier.

Eligible Shareholders will be asked at the General Meeting to approve the Whitewash Resolution, thereby waiving the requirement for any of the Concert Parties to make a Mandatory Offer on the basis set out above. The Concert Parties have an interest in the Waiver and will be precluded from voting on the Whitewash Resolution.

The Waiver requires a fair and reasonable opinion to be provided by an independent expert. This is included as Annexure 1 to this Circular.

The TRP has confirmed that it is willing to consider the application to grant an exemption from the requirement of the Concert Parties to make a Mandatory Offer in the circumstances referred to above, if the majority of Eligible Shareholders of Global waive their entitlement to receive the Mandatory Offer from the Concert Parties in accordance with Regulation 86(4).

Any Global Shareholder wishing to make representations relating to the exemption shall have 10 Business Days from the date of posting of this Circular to make such representations to the TRP before the ruling is considered.

Representations should be made in writing and delivered by hand, posted or faxed to:

If any representations are made to the TRP within the permitted timeframe, the TRP will consider the merits thereof before making a ruling.

Included in this Circular is the notice of General Meeting and the Whitewash Resolution for Eligible Shareholders to consider, and if deemed appropriate, to approve at the General Meeting.

After the General Meeting has been held and the Whitewash Resolution has been passed, Global will inform the TRP, along with supporting documents, that the Whitewash Resolution has been passed in terms of Regulation 86(4). The TRP will then consider the application for the waiver and make a ruling.

Global will then announce the TRP's ruling and inform Shareholders that they may request the Takeover Special Committee to review the ruling within 5 Business Days of the requisite announcement. After expiry of the 5 Business Days' notice period, the TRP waiver proceedings will be regarded as completed.

5. BUSINESS DESCRIPTION AND PROSPECTS

Global historically specialised in arranging debt and mezzanine capital for large infrastructure and other projects. The Company also focused on developing and investing in business opportunities throughout Southern Africa.

Global intends to capitalize on the significant energy demand in Africa's most developed economy, South Africa, having developed a portfolio of alternative energy businesses focusing on hydrocarbon waste streams, namely plastic and rubber. The portfolio of businesses are centered around converting attractively priced raw materials from waste into highly sought after products, at attractive margins, using proven technologies, employing a team of engineers with deep experience in alternative energy, to deliver extraordinary returns to investors in an environment experiencing ever growing energy needs.

Since its listing in 2012, the Company has changed its focus on renewable energy businesses as well as waste-to-energy opportunities. The Board of Global has since crafted a long term strategy, which has carefully mapped out the various milestones to be obtained during its 5 year transition period, from being an asset finance house into becoming an important player in the renewable energy sector through its GAM New Energy (Pty) Ltd ("GAM New Energy") subsidiary. During the transition period, Global will continue to employ its asset finance business, LFS Assets (Pty) Ltd, as a finance base and main source of revenue.

Creative utilisation of traditional energy types (liquid fuels) and new technologies (as is happening in the motor vehicle industry with hybrids) will dominate the energy landscape for the next 50 years. Against this backdrop, GAM New Energy focuses on exploiting rising energy demand and rising energy costs, whilst at the same time delivering a sustainable and environmentally friendly solution to the growing waste problem. The business model is simple, yet powerful:

- by converting "cheap" and "problematic" resources such as waste plastic and waste rubber;
- into valuable products such as oil, steel and carbon black;
- the company will not only realise highly attractive returns;
- but at the same time will solve a significant environmental waste problem;
- as well as produce a replacement product for imported oil; and
- creating many new employment opportunities.

Through its subsidiary Enviroprotek (Pty) Ltd ("Enviroprotek"), Global has established a waste tyre recycling plant, which converts waste rubber into industrial fuel oil, carbon black and steel. Enviroprotek was formed in 2013 for the purposes of pursuing the strategy for rubber recycling. Operating expenses and a loss of R587k before taxation was incurred for the year ended 30 November 2015. Progress has been slow due to the length of time for the various environmental approvals and licences required. Subsequent to year end, the plant has been successfully commissioned and is operational, albeit at very low levels of production due to this being done on a test basis. Enviroprotek is still awaiting its petroleum licence to be approved before the business can start realising its potential and for the plant to be fully operational. Currently Enviroprotek is still operating at a loss, with minimal revenues. Furthermore, an application to REDISA has been made, to be allocated waste tyres under the REDISA plan. Both the petroleum licence and REDISA approval requires Enviroprotek to be 51% BEE owned.

GAM New Energy has also given the go ahead towards the planning and detailed engineering phase of its first waste plastic plant in Springs, housed within Plastic Green Energy (Pty) Ltd ("PGE"), a joint venture with Futuregrowth Asset Management (Pty) Ltd. Making use of proprietary technology acquired through the purchase of the majority shareholding in Earthwise Energy Holdings (Pty) Ltd, PGE will recover the latent energy inherent in waste plastic by converting it into liquid fuel, aimed at the industrial fuel oil market.

GAM New Energy has commenced with the launch of its first Concentrated Solar Power test plant through its affiliate Heliosek (Pty) Ltd. The technology allows for the highly efficient exploitation of the unlimited solar resource base of Southern Africa and creates an opportunity for the expansion into

other international jurisdictions. The technology offers an alternative to existing solar energy and other renewable energy solutions, by offering electricity capacity at peak times via its thermal storage capabilities, at competitive prices.

The Board believes that the Group has good prospects to diversify its operations over the next year, based on its current pipeline of projects, initiatives and strong management skills.

REPORT OF THE INDEPENDENT EXPERT

"The Independent Board
Global Asset Management Limited
Ruimsig Country Office Park
Block E
129 Hole in One Avenue
Ruimsig North

14 October 2016

Dear Sirs

REPORT OF THE INDEPENDENT PROFESSIONAL EXPERT TO GLOBAL ASSET MANAGEMENT LIMITED REGARDING THE WAIVER OF A MANDATORY OFFER**INTRODUCTION**

In an announcement published by Global Asset Management Limited ("Global" or the "Company") on the Stock Exchange News Service of the JSE Limited ("JSE") ("SENS") on 29 June 2016, it was advised that Global was in advanced negotiations with African Rainbow Capital ("ARC") in terms of which ARC will subscribe for 19 323 671 Global issued ordinary shares of no par value ("Shares") which constitutes approximately 26.3% of Global's Shares at a subscription price of R2.07 per Share (the "Global Subscription Price" or the "Offer Price") to the total value of R40 million (the "Global Subscription").

In terms of the Global Subscription, ARC entered into an arrangement which will allow the parties who have agreed to form part of a voting pool and are owners of the beneficial interests in the Shares, being:

- ARC;
 - Earthwise Recycling Proprietary Limited ("Earthwise");
 - Conceptual Technologies Africa Proprietary Limited ("Conceptual Technologies");
 - Proprocess Engineering Proprietary Limited;
 - The Trustees for the time being of the Balalaika Trust;
 - The Trustees for the time being of the JSRI Trust;
 - The Trustees for the time being of Die Loerie Trust;
 - The Trustees for the time being of The Altena Investments Trust;
 - The Trustees for the time being of the Van Ettinger Family Trust;
 - Niels Penzhorn;
 - Mark Anthony Marcus, an indirect shareholder of Global;
 - Sergio-Battista Burelli, an indirect shareholder of Global;
 - Johan Adrian Moolman, an indirect shareholder of Global; and
 - Johannes Kruger, an indirect shareholder of Global;
- (the "Concert Parties") to maintain control of Global (the "Voting Pool Arrangement")

Pursuant to the Global Subscription, ARC will subscribe, at a nominal consideration, for such number of shares in Enviroprotek Proprietary Limited, a subsidiary of Global, ("Enviroprotek") such that it acquires 46% of the shares in Enviroprotek, and will enter into appropriate shareholder arrangements.

A further announcement was released on SENS on 29 September 2016 advising shareholders that the Final Global Subscription agreement and the Voting Pool Agreement had been signed (the "Transaction").

One or more of the Concert Parties may wish to increase their shareholding in Global in the future. If any of the Concert Parties were to acquire any (1 or more) number of Shares whilst still in concert this would constitute an affected transaction as defined in the Companies Act, No. 71 of 2008 as amended (the "Companies Act") and the Companies Act Regulations, 2011, as amended ("Companies Regulations").

SCOPE

In terms of section 123 of the Companies Act, the Concert Parties may be required to make a mandatory offer to the minority shareholders of Global, offering to acquire their shares at the Subscription Price, namely R2.07 per share (the "Mandatory Offer"). Regulation 86(4) of the Companies Regulations, states that independent holders of more than 50% of the general voting rights of all of the issued securities of an affected company may resolve to waive the benefit of such a mandatory offer to be made in terms of section 123 of the Companies Act (the "Waiver") by a proposed ordinary resolution for the ordinary shares not already owned or controlled by the Concert Parties (the "Whitewash Resolution"). We understand that the Takeover Regulation Panel ("TRP") will be asked to grant such a waiver after approval of the Waiver by the shareholders.

As at the issue date of this opinion, the share capital of the Company comprises authorised share capital of 1 000 000 000 ordinary Shares and issued share capital of 54 157 575 Shares. The Company holds no Shares in treasury.

FAIR AND REASONABLE OPINION REQUIRED IN RESPECT OF THE WAIVER

In terms of regulation 86(7) of the Companies Regulations a fair and reasonable opinion is required in the circular to shareholders requiring approval of the Waiver (the "Circular"). BDO Corporate Finance (Proprietary) Limited ("BDO Corporate Finance" or "the Independent Expert") has been appointed by the Directors to provide an opinion as to whether the terms and conditions of the Transaction are fair and reasonable insofar as Shareholders are concerned (the "Fair and Reasonable Opinion").

Full details of the Transaction are contained in the Circular to be dated on or about 18 November 2016, which will include a copy of this letter.

The material interests of the directors are set out in section 7.2 of the Circular and the effect of the Waiver on those interest and persons are set out in this section of the Circular.

RESPONSIBILITY

Compliance with the Companies Act is the responsibility of the directors of Global. Our responsibility is to report on the fairness and reasonableness of the terms and conditions of the Waiver.

We confirm that the Fair and Reasonable Opinion has been provided to the Independent Board for the sole purpose of assisting the Independent Board in forming and expressing an opinion for the benefit of Global Shareholders.

EXPLANATION AS TO HOW THE TERMS "FAIR" AND "REASONABLE" APPLY IN THE CONTEXT OF THE TRANSACTION

The "fairness" of a transaction is based on quantitative issues. A transaction may be said to be fair if the benefits received by shareholders, as a result of the transaction, are equal to or greater than the value ceded by shareholders.

The Waiver may be said to be fair if the Offer Price would be less than or equal to the fair value of a Global Share or unfair if the Offer Price would be greater than the fair value of a Global Share.

The assessment of reasonableness of the Waiver is based on the potential Offer Price in relation to the prevailing trading price of a Global Shares as at the time of the Transaction.

It is therefore conceivable that if the Waiver of the potential Offer Price is less than either the estimated fair value per security or current traded price per Global Shares, but not both, the Waiver of the potential Offer Price could be considered fair but not reasonable or reasonable but not fair.

The valuation approaches are discussed below:

LFS

“Market Value” for financial services firms is commonly derived by applying one or more of the following valuation methodologies:

- Fair price/book (“P/B”);
- Return on tangible equity (“RoE”);
- P/E Multiples (“Market approach”); and
- Dividend discount and residual income models (“DCF methodology”).

The valuation of LFS was performed by applying the DCF methodology. In addition, we considered the P/B and P/E multiple approaches (based on financial data for comparable publicly traded companies) as secondary methodologies to support the results of the discounted cash flow valuation.

The valuation was performed taking cognisance of risk and other market and industry factors affecting LFS. Key internal value drivers to the discounted cash flow valuations of LFS included the discount rate, sustainable earnings and earnings growth rates.

External value drivers include key macro-economic parameters such as, GDP growth, interest rates, headline inflation rates, and prevailing market and industry conditions in the sector in which LFS operates were also considered in assessing the forecast cash flows and risk profile of LFS.

Enviroprotek

We applied the Income Approach based on NPV that is derived using a DCF technique applied to the post-tax pre-finance cash flows of Enviroprotek. Key external value drivers include the GDP growth, interest rates, headline inflation rates, and prevailing market and industry conditions in the waste recycling sector. Key internal value drivers include production rates and the life of the plant, off taker demand, operating costs, working capital and capital expenditure requirements. We have relied upon the financial and operational model prepared, in determining the life of the plant and production rate inputs into the DCF model. As the company comprises an early stage asset, a price to DCF ratio was applied to the NPV’s to reflect the technical, financing and development risks typical to early-stage assets.

PGE

As PGE is an early stage asset which has not yet entered into the production phase, a cost approach was used represented by its net asset value ("NAV").

Global Head Office

The valuation of the Global head office has been determined based upon the DCF approach. The Global head office corporate costs were discounted at a rate equal to LFS' cost of equity.

VALUATION RESULTS

In undertaking the valuation exercise above, we determined a valuation range for Global Shares of R1.96 to R2.45 per Global Share, with a most likely value of R2.26 per Global Share. The Offer Price which will be the subject of the Waiver therefore falls within the suggested range calculated from our valuation and is also below the NAV per Global share of the Company of R2.76.

The valuation range above is provided solely in respect of this opinion and should not be used for any other purposes.

OPINION

BDO Corporate Finance has considered the proposed terms and conditions of the Waiver, based upon and subject to the conditions set out herein, is of the opinion that the terms and conditions of the Waiver, based on quantitative considerations, are fair to the Global shareholders.

We are of the opinion that the proposed terms and conditions of the Waiver are reasonable from the perspective of the Global shareholders, as the Transaction is at a premium to the closing price of a Global Share the day prior to the announcement on SENS of R2.00 per Global Share.

Our opinion is necessarily based upon the information available to us up to 14 October 2016, including in respect of the financial, market and other conditions and circumstances existing and disclosed to us at the date thereof. We have furthermore assumed that all conditions precedent, including any material regulatory and other approvals and consents required in connection with the Transaction have been fulfilled or obtained.

Accordingly, it should be understood that subsequent developments may affect this opinion, which we are under no obligation to update, revise or re-affirm.

COMMON CONTROL RESERVE

Common control arose on the acquisition of LFS Assets (Pty) Ltd from a fellow subsidiary.

ACCOUNTING POLICIES

for the year ended 30 November 2015

1. Presentation of Annual Group Financial Statements

Global Asset Management is a Company listed on the Johannesburg Stock Exchange and is domiciled in South Africa. The consolidated financial statements at 30 November 2015 comprise the Company and its subsidiaries (together referred to as "the Group"). The going concern principal has been adopted in the preparation of the financial statements.

Statement of Compliance

The Group's financial statements have been prepared in accordance with and comply with International Financial Reporting Standards ("IFRS") and its interpretations issued by the International Accounting Standards Board ("IASB"), the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Pronouncements as issued by Financial Reporting Council.

The Group's financial statements are prepared using a combination of historical cost and fair value bases of accounting. Those categories to which fair value basis of accounting has been applied are indicated in the individual accounting policies.

The financial statements are presented in Rand, which is the Group's functional currency. These accounting policies are consistent with the previous period.

1.1. Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and all entities, which are controlled by the Company.

The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The results of subsidiaries are included in the consolidated financial statements from the effective date of acquisition to the effective date of disposal. Adjustments are made when necessary to the financial statements of subsidiaries to bring their accounting policies in line with those of the Group. All intra-Group transactions, balances, income and expenses are eliminated in full on consolidation.

1.2. Significant judgements and sources of estimation uncertainty

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that may affect the application of accounting policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from the other sources. Actual results may differ from these estimates.

The accounting estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future period affected. Judgements made by management in the application of IFRS that have a significant effect on the financial statements and estimates with a significant risk of material adjustment in the next year are disclosed in the notes to the financial statements where appropriate.

1.2.1. Trade receivables and/or loans and other receivables and advances

The Group assesses its loans and receivables for impairment at each reporting date. In determining whether an impairment loss should be recorded in the profit or loss, the Group makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

1.2.2. Fair value estimation

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Group uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

1.2.3. Impairment testing of non-financial assets

The recoverable amounts of cash-generating units and individual assets, including intangible assets, have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the assumptions may change which may then impact our estimations and may then require a material adjustment to the carrying value of tangible assets.

1.2.4. Taxation

Judgement is required in determining the provision for income taxes due to the complexity of legislation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

The Group recognises the net future tax benefit related to deferred income tax assets to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future. Assessing the recoverability of deferred income tax assets requires the Group to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecasted cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Group to realise the net deferred tax assets recorded at the reporting date could be impacted.

1.3. Property, plant and equipment

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits associated with the item will flow to the Company; and
- the cost of the item can be measured reliably.

Property, plant and equipment are initially measured at cost.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

Property, plant and equipment are carried at cost less accumulated depreciation and any impairment losses.

Item	Average useful life
Forklifts	8 years
Furniture and fixtures	6 years
Motor vehicles	5 years
Office equipment	6 years
IT equipment	3 years
IT software	3 years
Containers	20 years

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting period. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

The depreciation charge for each period is recognised in profit or loss unless it is included in the carrying amount of another asset. The depreciation charge gets recognised when the asset is available for use.

The gain or loss arising from the de-recognition of an item of property, plant and equipment is included in profit or loss when the item is derecognised. The gain or loss arising from the de-recognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

1.4. Intangible assets

An intangible asset is recognised when:

- 1) it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity; and
- 2) the cost of the asset can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses. The amortisation period, the amortisation method and the residual values for intangible assets are reviewed every period-end.

The impairment test for intangible assets not yet ready for use is performed annually by comparing its carrying amount with the recoverable amount.

Recoverable amounts for intangible assets are based on the higher of value in use or fair value less costs to sell. Value in use is calculated from cash flow projections for generally five years using data from the Group's latest internal forecasts, the results of which are reviewed by the Board. The key assumptions for the value in use calculations are those regarding discount rates, growth rates and expected changes in margins.

1.5. Investment in joint ventures and associates

A joint venture is an entity which the group jointly controls and an associate is an entity in which the group has significant influence. The group's interests in joint ventures and associates are accounted for on the equity accounting basis.

Financial results of the joint venture and associate are prepared for the same reporting period as the parent Company. Where necessary, adjustments are made to bring the accounting policies in line with those of the group.

After application of the equity accounting method, the group determines whether it is necessary to recognise an additional impairment loss on the group's investment in a joint venture and associate. The group determines at each statement of financial position date whether there is any objective evidence that the investment in the joint venture and associate is impaired. If this is the case, the group calculates the amount of impairment as being the difference between the recoverable amount of the joint venture or associate and the carrying value and recognises the amount in profit or loss.

1.6. Financial instruments

1.6.1. Initial recognition

The Group classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement.

For financial instruments which are not at fair value through profit and loss, transaction costs are included in the initial measurement of the instrument.

The Group designates on initial recognition financial instruments at fair value through profit or loss.

1.6.2. Subsequent measurement

1.6.2.1. Financial assets

Financial instruments at fair value through profit or loss are subsequently measured at fair value, with gains and losses arising from changes in fair value being included in profit or loss for the period.

Most of the group's financial instruments are classified as loans and receivables and are measured at amortised cost.

1.6.2.2. Financial liabilities

All of the group's financial liabilities are classified at amortised cost using the effective interest rate method.

1.6.2.3. Available for sale reserve

When the investment is disposed of or is determined to be impaired, the accumulative gain or loss previously accumulated in the investment revaluation reserve is reclassified through profit or loss.

1.7. Taxation

1.7.1. Current tax liabilities and assets

Current tax for current and prior periods is, to the extent unpaid, recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset.

Current tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the reporting date.

1.7.2. Deferred tax liabilities and assets

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised. A deferred tax asset is not recognised when it arises from the initial recognition of an asset or liability in a transaction at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for the carry forward of unused tax losses to the extent that it is probable that future taxable profit will be available against which the unused tax losses can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the reporting date.

1.7.3. Tax expenses

Current and deferred taxes are recognised as income or an expense and included in profit or loss for the period, except to the extent that the tax arises from:

- a transaction or event which is recognised, in the same or a different period, directly in equity, or other comprehensive income, or
- a business combination.

Current tax and deferred taxes are charged or credited directly to equity if the tax relates to items that are credited or charged, in the same or a different period, directly to equity.

1.8. Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

1.8.1. Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease

payments. The corresponding liability to the lessor is included in the statement of financial position as other financial liabilities.

The lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate on the remaining balance of the liability.

1.8.2. Operating leases - lessor

Operating lease income is recognised as an income over the lease term on a straight line basis. Income for leases is disclosed in profit or loss.

1.8.3. Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset. This liability is not discounted. Any contingent rents are expensed in the period they are incurred.

1.9. Impairment of assets

The Group assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the Group estimates the recoverable amount of the asset.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined.

The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in profit or loss.

An entity assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in profit or loss.

1.10. Inventories

Inventories are measured at the lower of cost and net realisable value. The cost of inventories includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their existing location and condition.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and selling expenses.

This accounting policy will become significant when the conversion of waste rubber into industrial fuel activities achieves full production.

1.11. Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave, sick leave and bonuses), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of profit sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

1.12. Revenue

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and that revenue can be measured reliably. Revenue is measured at the fair value of the consideration received or receivable. Value added tax is excluded.

Revenue is recognised on the following basis:

- Sale of forklifts is recognised when the significant risks and rewards of ownership of the goods are transferred to the buyer;
- Rendering of services relates to maintenance of forklifts and management fees and is recognised when the service has been provided;
- Rental income arising from operating leases on forklift trucks is accounted for on a straight –line basis over the lease terms; and
- Interest income is recognised on instalment sale agreements as interest accrues using the effective interest method.

1.13. Sale and leaseback arrangements

1. **Basis of Preparation**

The board of directors is pleased to present the Group's unaudited results for the six month period ended 31 May 2016. The accounting policies adopted for purposes of this report comply, and have been consistently applied in all material respects, with International Financial Reporting Standards ("IFRS"). The abridged financial statements have been prepared in accordance with the requirements of IAS 34 (Interim Financial Reporting) and the JSE Listings Requirements. The results are presented in Rand and the going concern principal has been adopted in the preparation of the results.

The same accounting policies and methods of computation have been followed as compared to the prior audited period namely 30 November 2015.

The financial results have been prepared by the financial director, Mr W Basson CA (SA).

2. **Industry and Business Overview**

Global announced its intent to focus on renewable energy businesses as well as waste-to-energy opportunities during 2015. The Board of Global has since crafted a long term strategy, which has carefully mapped out the various milestones to be achieved during its 5 year transition period from being an asset finance house into becoming an important player in the renewable energy sector through its GAM New Energy (Pty) Ltd ("GAM New Energy") subsidiary. During the transition period Global will continue to employ its asset finance business, LFS Assets (Pty) Ltd, as a finance base and main source of revenue.

Through its newly founded subsidiary Enviroprotek (Pty) Ltd ("Enviroprotek"), Global has established a waste tyre recycling plant, which converts waste rubber into industrial fuel oil, carbon black and steel. The plant has been successfully commissioned and is fully operational. An application to REDISA has been made to be allocated waste tyres under the REDISA plan.

GAM New Energy has also given the go ahead for the planning and detailed engineering phase of its first waste plastic plant in Springs, housed within Plastic Green Energy (Pty) Ltd ("PGE"), a joint venture with Futuregrowth Asset Management (Pty) Ltd. Making use of proprietary technology acquired through the purchase of the majority shareholding in Earthwise Energy Holdings (Pty) Ltd, PGE will recover the latent energy inherent in waste plastic by converting it into liquid fuel, aimed at the industrial fuel oil market.

GAM New Energy has commenced with the launch of its first Concentrated Solar Power ("CSP") plant through its associate Heliosek (Pty) Ltd. The technology allows for the highly efficient exploitation of the unlimited solar resource base of Southern Africa and creates an opportunity for expansion into other international jurisdictions. The technology offers an alternative to existing solar energy and other renewable energy solutions at a lower comparative cost.

3. **Financial Results**

Revenue dropped to R86.2 million for the six months ended 31 May 2016 from R93.8 million for the prior comparative period. This was mainly due to the weak market conditions. Cost of sales was R58,7 million for the six month ended 31 May 2016.

Other income increased to R5.9 million from R173k, primarily due to value realised on the sale of 9.5% of Total Rubber Recycling ("TRR") as part of the Earthwise transaction, further details of which are set out below.

Global achieved an interim profit of R5.5 million for the six months ended 31 May 2016, in spite of incurring operating and development costs on its early-stage renewable energy businesses in the group in line with the long-term strategy of Global. Profits in relation to these businesses are expected to commence over the next six to eighteen months.

It should be noted that the current portion of other financial liabilities reflected on the balance sheet represents a 12 month accrual for finance associated with the Group's rental book. On the other side, Trade and Other Receivables only reflect approximately the current receivables arising from the matching rental contracts. The net current liability position of the Group is considered sound as current liabilities will be settled by on-going monthly rental billings.

Acquisition of a controlling interest in Earthwise Energy Holdings (Pty) Ltd:

As announced on SENS, during December 2015, GAM acquired a controlling interest in Earthwise Energy Holdings (Pty) Ltd ("EWEH"). The controlling interest held after this transaction is 95.25% and is made up as follows:

- 5% acquired from Altena (Transaction 1) during December 2015;
- 85.25% acquired from vendors (Transaction 2) during December 2015; and
- 5% acquired in previous financial periods.

Transaction 1

A 5% interest in EWEH was acquired for a cash consideration of R2 million from Altena, this transaction was in contemplation of Transaction 2 described below.

Transaction 2

An 85.25% interest in EWEH was acquired by a combination of cash and equity instruments including components that are contingent on future events. Each of the major components, and the related fair values (which may differ from the agreement values between parties), are disclosed in the table below:

Acquisition of 85.25% in December 2015:

	R
8 111 309 GAM shares	23 236 966
Cash consideration	2 368 055
Additional GAM shares contingent on profit warrants	1 724 567
Additional contingent cash amount	826 585
TRR shares transferred to vendors	6 021 152
Total	34 177 325

Previously held interest

GAM held 5% in EWEH from prior periods and the fair value of this 5% determined as R2 million (based on the price achieved in Transaction 1 above).

The total consideration paid for the 95.25% interest in EWEH, inclusive of the previously held interest is therefore R38.2 million. At the date of acquisition, the fair value of EWEH's net assets was provisionally determined to be R0.8 million. Consequently, Goodwill on the acquisition of EWEH is provisionally determined as follows:

	R
Consideration paid	38.2 million
Non-controlling interest	1.9 million
Less, Fair value of assets acquired	(0,8 million)
Total	R39,3 million

GAM is of the view that the proprietary technology developed by EWEH in the area of plastic to oil operations will prove to become extremely valuable in the area of renewable energy and is therefore satisfied that the goodwill on the transaction is reflective of the value expected to be realised in the future from the acquisition.

Alternatively, if they wish to attend the General Meeting in person, they should request the CSDP or broker to provide them with a letter of representation in terms of the CSDP or broker.
2. This proxy form will not be effective at the General Meeting unless received by the Transfer Secretaries of the Company at 13th Floor, Rennie House, 19 Ameshoff Street, Braamfontein, 2001 (PO Box 4844, Johannesburg, Republic of South Africa, 2107), not later than 10h00 on Tuesday, 13 December 2016 .
3. This proxy shall apply to all the Ordinary Shares registered in the name of Shareholders at the record date for voting unless a lesser number of Shares are inserted.
4. A Shareholder may appoint one person as his proxy by inserting the name of such proxy in the space provided. Any such proxy need not be a Shareholder. If the name of the proxy is not inserted, the chairman of the General Meeting will be appointed as proxy. If more than one name is inserted, then the person whose name appears first on the form of proxy and who is present at the meeting will be entitled to act as proxy to the exclusion of any persons whose names follow. The proxy appointed in this proxy form may delegate the authority given to him in this proxy by delivering to the Company, in the manner required by these instructions, a further proxy form which has been completed in a manner consistent with the authority given to the proxy of this proxy form.
5. Unless revoked, the appointment of proxy in terms of this proxy form remains valid until the end of the General Meeting even if the General Meeting or a part thereof is postponed or adjourned.
6. If:

then the proxy shall comply with those instructions.

7. If this proxy is signed by a person (signatory) on behalf of the Shareholder, whether in terms of a power of attorney or otherwise, then this proxy form will not be effective unless:

The chairman of the General Meeting may, at his discretion, accept or reject any proxy form or other written appointment of a proxy which is received by the chairman prior to the time when the General Meeting deals with a resolution or matter to which the appointment of the proxy relates, even if that appointment of a proxy has not been completed and/or received in accordance with these instructions. However, the chairman shall not accept any such appointment of a proxy unless the chairman is satisfied that it reflects the intention of the Shareholder appointing the proxy.
